ETERNYTIME Racer

The first autonomous professional timekeeping system

made in France

Are you an Automobile, Motorbike, Motocross, Karting driver?
As long as the circuit is equipped with our Chronelec timing system and our automated data server, download our application available on IOs and Android and all your times will be recorded automatically.

Compatible transponder

The whole CHRONELEC transponder range compatible with Protime Elite, Protime and RF decoders

Chronelec Elite transponder (wired or rechargeable),
LS (wired or rechargeable)
RF, RK and RC transponder

The circuit must be equipped with a Chronelec decoder and the local server "**ETERNYTIME RACER**"
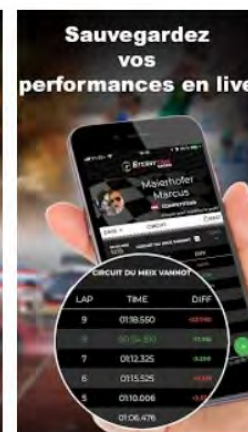

How does it works?

1. Download our app from Google PlayStore or the Appstore. Install the latest version and create your pilot account.

2. Enter the transponder number you have or have had assigned and start your sessions

3. Select your circuit as well as your vehicle (Motocross, Moto, Auto, Karting and the category
(this will be used to compare you with other competitors of the same category on the same track)

Start your session and go on track!

Thanks to your internet connection, you will get your times live on your smartphone every lap!

Your results are automatically saved in your profile.
